OKLAHOMA BULLETIN NO. OK190-3-13

SUBJECT: ECS – “Redbook” for Herbicide Labels

Purpose: To provide guidance on obtaining current herbicide labels.

Expiration Date: September 30, 2003

Oklahoma NRCS has tried to provide current herbicide labels for field office reference over the past few years. These were filed in what was called the "Redbook", which is a three-ring binder informally filed in the field office. The Oklahoma NRCS is no longer supporting the "Redbook". The labels can change without notice and we are never certain if the Redbook is current.

In its place, two websites are recommended that are typically current. The first one is: <http://www.oda.state.ok.us/pics.htm>. This is one of the web pages for the Oklahoma Department of Agriculture. Once on this page, click on Pesticides, then Registered Pesticides, then Pesticide Registration Data Searches. This allows you to enter criteria and retrieve label information.

Another source for label information is the “Green Book” web site at: <http://www.greenbook.net/main.html>. Once on this page, select Labels and make your choice.

It is the responsibility of the applicators and users of pesticides to follow the label. The NRCS recommendations should also be label compatible. These references can provide information as to permissible uses of herbicides according the latest label.

Filing Instructions: Offices should immediately dispose of the “Redbook” and its contents.

Questions concerning this bulletin may be directed to Ken Matlock, State Agronomist, at 405.742.1241, or Mark Moseley, Grazing Land Specialist, at 405.742.1235.

A handwritten signature in black ink, appearing to read "M. Darrel Dominick".
